PROFESSIONAL SUMMARY

Frontend Developer who builds responsive, role-based web interfaces with HTML5, CSS3, JavaScript and Bootstrap, backed by a Computer Science (Data Science) degree and solid Java, SQL and Git fundamentals. Skilled at turning multi-step workflows such as scheduling, registration and patient management into clear, easy-to-use layouts for non-technical users. Currently learning React.js and REST API integration through a Java Fullstack certification. Seeking an entry-level Frontend Developer role.

TECHNICAL SKILLS

- **Frontend:** HTML5, CSS3, JavaScript (DOM manipulation, event handling, form validation, localStorage), Bootstrap 5, Responsive Design, Cross-device Compatibility
- **Currently Learning:** React.js, REST API integration (Java Fullstack Certification, Qspiders, expected Nov 2026)
- **Languages:** JavaScript, Java (OOP), SQL, C, Python
- **Databases:** MySQL, Oracle, Advanced SQL (HackerRank certified)
- **Tools:** Git, GitHub, VS Code, Excel
- **Concepts:** Role-based interface design, responsive layouts, usable and accessible UI, client-side validation

PROJECTS

MediFlow HMS — Hospital Management System | HTML, CSS, JavaScript | Sep 2024 – Dec 2024
GitHub: github.com/Shreya1421/mediflow-hms

- Designed and built the frontend of a hospital management system covering patient registration, appointment scheduling and ward management across 5+ modules.
- Built role-based dashboards for doctors and admins, consolidating 8 separate workflows into a single, structured navigation system.
- Kept UI and JavaScript logic separated so modules stay organized and easier to maintain.
- Designed clean, low-friction layouts that make the system easy to use for non-technical hospital staff.

CampusSphere — Smart College Event Management Platform | HTML, CSS, Bootstrap | Sep 2023 – Jan 2024
GitHub: github.com/Shreya1421/campussphere

- Built a responsive multi-portal interface (student, organizer and admin) for event registration, scheduling and attendance tracking, designed for events of up to 500 participants.
- Implemented client-side form validation and a calendar-based scheduling UI to simplify the coordinator's workflow.
- Used Bootstrap's grid and components to keep layouts consistent across screen sizes.

INTERNSHIP & TRAINING

Web Development Virtual Internship — Acmegrade | Jun – Aug 2025

- Built responsive e-commerce pages with a focus on UI design and cross-device compatibility.

Java Programming & OOP Summer Training — Softpro India | Apr – Jun 2024

- Applied inheritance, polymorphism and exception handling in Java applications.

CERTIFICATIONS

- **Java Fullstack Development** — Qspiders (in progress, expected Nov 2026): Core Java, SQL and HTML/CSS/JS completed; React, Spring Boot and REST APIs in progress
- **SQL (Advanced)** — HackerRank Certificate of Accomplishment, Aug 2026

EDUCATION

B.Tech — Computer Science & Engineering (Data Science) | Nov 2022 – Jun 2026
ABES Institute of Technology, AKTU University
